Economic Fuel Usage

With diesel prices high across the country, the most economical thing any driver can do is conserve fuel use. Easier said than done, I know!

- Slow down- and I am not just saying that as the safety lady. Operating at 75 mph consumes roughly 27% more fuel than driving at 65 mph.
- Use cruise control- Maintaining a steady and consistent speed can save up to 6-14% on fuel
- Manage your RPM's- Keep your engine in it's "sweet spot" between 1,250 and 1,350 RPM while avoiding going over 1,500 RPM.
- Reduce your idling- Use your APU or turn the truck off when

possible. Idling burns about 0.8 gallons of fuel every hour.

- Keep tires up to pressure- Properly inflated tires save fuel, while even a small drop in PSI increases rolling resistance and wastes money.
- Keep up with routine service- Clean air filters, proper wheel alignments, and healthy oil levels prevent the engine from working harder than necessary.

OSTROWSKE AT GOODYEAR

Spotlight Driver- Aaron Drummer

Aaron has been a contractor with General Transport since July 2019, and has driven over 1,050,000 miles.

*You're
AWESOME
just sayin' ♥*

He has worn a few different hats while working here from the triangle to Amazon. Aaron is a dedicated worker, and is always willing to

help someone out or have a conversation. We are proud to have you as part of the GT Family!

Trailer Registrations are in!

Please keep an eye out for trailer registrations. Trailers 5084-5177 and 5436-5580 have permanent plates, but all other trailers will need updated. Please make sure you do not leave the terminal with an expiring registration. Truck registrations will be ready sometime this month. They both expire 11/30/2026.

All permits are also in your Samsara
